DUMPING HOPPER

FOR ALL THINGS FASTENING.

CUSTOMER SERVICE: 888.859.6060 | SALES@ALLFASTENERS.COM

The **HEAVY DUTY DUMPING HOPPERS** can safely handle capacities of up to 8,000 lbs. The unique E-Z Release handle allows dumping to be safe, effortless, and quick. The flame cut rocker design provides a stronger more durable hopper as opposed to a press fit, welded pins, or rivet style multi-piece assembly. The heavy duty hopper is available in standard sizes from 1/4 cubic yard through 5 cubic yards.

COMMON APPLICATIONS: All types of bulk material such as scrap steel, glass, stampings, sawdust, rubber, coal, ash, various aggregates, construction debris, solid waste, grit & screenings & hundreds more.

SIZING INFORMATION

Part No.	Item	Capacity	QTY
14HD100AF	Heavy Duty Dumping Hopper	1 Cubic Yard	1
14HD150AF	Heavy Duty Dumping Hopper	1-1/2 Cubic Yards	1

HEAVY DUTY HOPPER FEATURES

- Hopper bodies are made of 7-gauge & ¼” mild carbon steel, and the bases are made from ¼” plate. Thicker gauges available.
- Flame cut rocker system providing high strength and wear resistance for long life and dependable service.
- Flame cut stops & structural angle reinforcements.
- Structural angles and channels are used to provide better durability versus formed steel
- Continuous welding inside the bucket provides greater strength in critical areas.
- The hoppers top four corners are fitted stampings providing a smooth surface for safe handling.
- Hoppers are stackable up to 2 cubic yard models.
- Heavy duty removeable castors available.
- Made in the USA.
